Family Strengthening & Support

Hector Tatis
Program Specialist
Family Strengthening & Support

Letter of Completion

The Positive Parenting Program (Triple P) is a multi-level system of family intervention for parents of children who have or are at risk of developing behavior problems. It is a preventively oriented program that aims to promote, positive caring relationships between parents and their children, and to develop effective management strategies for dealing with a variety of childhood behavior problems and common development issues.

Seminar 1: The Power of Positive Parenting

Here we establish the building blocks for the program as it introduces parents to the five core principles of positive parenting: having a safe, interesting environment for children; having a positive learning environment; using assertive discipline; having realistic expectations; and taking care of yourself as a parent.

Seminar 2: Raising Competent, Confident Children

This builds on the seminar 1 and shows parents how they can use positive parenting principles to teach children important values and skills, including encouraging respect and cooperation, as well as how to get along with others, be independent, develop healthy self-esteem, and become good problem solvers. These skills enable children to do well both in school and beyond.

Seminar 3: Raising Resilient Children

Here we focus on helping children learn emotion-regulation skills. Parents are often uncertain about how to respond to children's expression of emotion in ways that help children learn to manage their feelings. This seminar deals with how to help children recognize and accept feelings, express their feelings appropriately, build positive feelings, deal with negative feelings, develop coping skills, and deal with upsetting or stressful life events.

Sincerely,
